1 Introduction

4.5 Purpose

The purpose of this document is to collect, analyze, and define high-level user needs and product features. Focus on capabilities needed by the target users and why these needs exist. The specific requirements of how the application fulfills these needs should be provided elsewhere in the **software requirements specifications** and the **use case specification.**

4.5 Scope

It's all about managing the materials. All the managed materials will be used it production phase. Procurement is integrated with material management. Materials can be imported from abroad, purchased locally or from inter company.

4.5 References

SL No.	Document Name / Description	File Name/ Ref. No	Document Source	Publishing Organization	Date of Accept
1	*MOM with SPL*				

Dit document is beschikbaar op studeersnel
Downloaded by Original NVK (khanh25051999@gmail.com)

2 Current System

There is no current software system to manage the materials yet. All materials are manually managed with legacy paper system.

Downloaded by Original NVK (khanh25051999@gmail.com)

3 Proposed System

Materials for production should be managed systematically with proper properties and attributes. The quantity should be synchronized according to the prototype. There a first in first out approach should be maintained. Safety stock is always a good practice to be followed.

4 List of Stakeholders

Category	Name	Designation and (Office Address, Email, Mobile)
Client	Tarafder Md Ruhul Amin	MD, Saif Powertech Ltd.
Client	Tarafder Md Ruhul Saif	Director, Saif Powertech Ltd.
Client	Lt. Col. Mostafizur Rahman (Retd.)	ED, Saif Powertech Ltd.
Client	Ferdous Wahid	Manager, ERP Development, Saif Powertech Ltd.
Client	Md Rashed Al Bannah	Asst. Manager, ERP Development, Saif Powertech Ltd.
Vendor	Khaled Salah Uddin	Manager, Product & Service, DataSoft Systems Bangladesh Ltd.
Vendor	Md. Atikur Rahman	Project Manager, Smart Enterprise, DataSoft Systems Bangladesh Ltd.
Vendor	Md. Mehedi Hassan	Technical Lead, Smart Enterprise, DataSoft Systems Bangladesh Ltd.
Vendor	Maruf Ahammed	Senior Software Engineer, Smart Enterprise, DataSoft Systems Bangladesh Ltd.
Vendor	Farhad Hossain Bakaul	Software Engineer, Smart Enterprise, DataSoft Systems Bangladesh Ltd.

5 Functional Business Requirements

FBR-001: Item Category

Requirement ID	FBR-001
Requirement Type	Input
Description/Business Logic	
Item category will enable user to add some item categories. These may be of type - Fixed Asset - Current Asset - Other Asset	
Justification	This configuration items are needed in Item master configuration.
Prototype/Mock Screen	

FBR-002: Item Unit

Requirement ID	FBR-002
Requirement Type	Input
Description/Business Logic	
Item Units will be used to measure the amount of items at different stages. These may piece, litter etc. There must be a configuration form to add these.	
Justification	This configuration items are needed in Item master configuration.
Prototype/Mock Screen	

FBR-003: Item Warehouse

Downloaded by Original NVK (khanh25051999@gmail.com)

Requirement ID	FBR-003
Requirement Type	Input
Description/Business Logic	
There must have storage locations where the materials are stored at various stages of production and various type of material (RM, SFG, FG etc.). These storage locations have their unique code, name and purpose. Main storage is the mother storage location. So storage location configuration should include - Unique code, - Name and - Purpose etc. The storage locations are (SPL Battery, Main Warehouse, Plate Preparation, Container Molding , De-Mineralized Water, Assembly-Flooded, Assembly-SMF, Assembly-MF, Assembly-MC, Finished Goods, Scrap Materials, Maintenance Spares).	
Justification	This configuration items are needed in Item master configuration.
Prototype/Mock Screen	

FBR-004: Item Attribute

Requirement ID	FBR-004
Requirement Type	Input
Description/Business Logic	
Item attributes, define the nature of an Item. These are like color, size etc. This feature will allow to add some item attributes through the system.	
Justification	This configuration items are needed in Item master configuration.
Prototype/Mock Screen	

FBR-005: Item Status

Dit document is beschikbaar op studeersnel
Downloaded by Original NVK (khanh25051999@gmail.com)

Requirement ID	FBR-005
Requirement Type	Input
Description/Business Logic	
Item status will define the status of an item like, if it is a raw material, finished or semi-finished item etc. There must be an option for adding some item status through the system.	
Justification	This configuration items are needed in Item master configuration.
Prototype/Mock Screen	

FBR-006: Material Master Maintenance

Requirement ID	FBR-006
Requirement Type	Input
Description/Business Logic	
Master data management will include the configurations items that will be used in various steps of battery production. When defining an item, its category, group, sub group, unit, safety stock amount etc should be selected. • Also, it is mandatory to select the attributes that is contained in the item.	
Justification	This configuration items are needed in various operations or steps of production.
Prototype/Mock Screen	

FBR-007: Technical Specification

Requirement ID	BR-007
Requirement Type	Input
Description/Business Logic	
An item may have different values for same attribute. These are termed as technical specification. There	

Downloaded by Original NVK (khanh25051999@gmail.com)

Requirement ID	BR-007
should have an option for defining technical specification against items. • It is to be noted that, the attributes will be defined by super admin but the attribute value in Specification form will be provided by general user.	
Justification	This configuration items are needed in various operations or steps of production.
Prototype/Mock Screen	

FBR-008: Goods quality checking

Requirement ID	FBR-008
Requirement Type	Input
Description/Business Logic	
The received goods are then sent for QA checking. QA team will check the goods on basis of some criteria. So there will be list of criteria which will include: - Material code - Quality criteria - Evaluation rating for each criterion. If any material failed to pass the minimum valuation, it may send back to vendors on terms basis. If these materials pass the criterions, the goods move to the main storage.	
Justification	
Prototype/Mock Screen	
Requirement ID	FBR-008
Requirement Type	Input
Description/Business Logic	
The received goods are then sent for QA checking. QA team will check the goods on basis of some criteria. So there will be list of criteria which will include: - Material code - Quality criteria - Evaluation rating for each criterion. If any material failed to pass the minimum valuation, it may send back to vendors on terms basis.

Requirement ID	FBR-008
Requirement Type	Input
If these materials pass the criterions, the goods move to the main storage.	
Justification	
Prototype/Mock Screen	

FBR-009: Item Opening

Requirement ID	FBR-009
Requirement Type	Input
Description/Business Logic	
Item Opening feature will enable user to add existing item's records to the software when the use of the software initially starts. Here item warehouse selection option is needed. Also here, user will select items depending on item category, specification, group etc.	
Justification	
Prototype/Mock Screen	

FBR-010: Stock In

Requirement ID	FBR-010
Requirement Type	Input
Description/Business Logic	
Stock in feature will allow to add item records to the system. While adding items to the systems, Chalan No, Chalan date, item warehouse should be selected. Again, it the item come by a purchase order, purchase order ID and date selection option should be enabled. Besides, multiple item selection option should exist there. While selecting an item, item category, specification, Unit prices etc should be selected.	
Justification	
Prototype/Mock Screen	

Downloaded by Original NVK (khanh25051999@gmail.com)

Requirement ID	FBR-010

FBR-011: Stock Out

Requirement ID	FBR-011
Requirement Type	Input
Description/Business Logic	
Stock Out Option will enable to record the item supplies against any requisitions. This stock out may be performed fully or partially. If partially performed, history or partial supply should be maintained.	
Justification	
Prototype/Mock Screen	

FBR-012: Goods movement between storages

Requirement ID	FBR-012
Requirement Type	Input
Description/Business Logic	
Good requested may be procured from internal storages. Goods may move in between storages. So it must be tracked time to time. So there should be a window to show each materials (RM, SFG, FG etc.) current status and storage location. There should be two types of status tracking. - List of issued material list to workstations. - List of received material list.	
Justification	
Prototype/Mock Screen	

Dit document is beschikbaar op studeersnel
Downloaded by Original NVK (khanh25051999@gmail.com)

FBR-013: Request for Procurement

Requirement ID	FBR-013
Requirement Type	Input
Description/Business Logic	
Request for procurement will produce the consolidated request of items that are required to procure.	
Justification	
Prototype/Mock Screen	

FBR-014: Handling of scraped goods

Requirement ID	FBR-014
Requirement Type	Input
Description/Business Logic	
Materials at any stage of production may get damaged or may be scraped for some reason. The scrapped item will move to Scrap Location (1600). So there will be a configuration item for recording this status of materials. This may include : - Item code - Item status - Reason for scraping	
Justification	
Prototype/Mock Screen	

FBR-015: Handling of replaced goods

Downloaded by Original NVK (khanh25051999@gmail.com)

Requirement ID	BR-015
Requirement Type	Input
Description/Business Logic	
There may come replacement of some scraped goods. These must be adjusted with the main storage. So, there must have some configuration option for recording this.	
Justification	
Prototype/Mock Screen	

FBR-016: Inventory Report: Material Age-wise

Requirement ID	BR-016
Requirement Type	Input
Description/Business Logic	
Age-wise [Based on Goods Received Number (GRN-Dt)];Inventory summary with provision of transaction detail.	
Justification	
Prototype/Mock Screen	

FBR-017: Inventory Report: Product Shipment Discrepancy and Claim Status

Requirement ID	BR-017
Requirement Type	Input
Description/Business Logic	
Report will Contain Product Shipment Discrepancy and Claim Status.	
Justification	

Dit document is beschikbaar op studeersnel
Downloaded by Original NVK (khanh25051999@gmail.com)

Requirement ID	BR-017
Prototype/Mock Screen	

FBR-018: Inventory Report: Cycle Counting information

Requirement ID	BR-018
Requirement Type	Input
Description/Business Logic	
Report will contain Cycle Counting information (Daily/weekly/Monthly).	
Justification	
Prototype/Mock Screen	

FBR-019: Inventory Report: Real time Stock Balance.

Requirement ID	BR-019
Requirement Type	Input
Description/Business Logic	
Report will contain Real time Stock Balance By Warehouse/Store wise (with provision of previous date report)	
Justification	
Prototype/Mock Screen	

FBR-020: Inventory Report: Return GRN Status

Requirement ID	BR-020
Requirement Type	Input

Downloaded by Original NVK (khanh25051999@gmail.com)

Requirement ID	BR-020
Description/Business Logic	
Report will contain details of Return GRN Status	
Justification	
Prototype/Mock Screen	

FBR-021: Inventory Report: Issue Statements

Requirement ID	BR-021
Requirement Type	Input
Description/Business Logic	
Report will contain details of Monthly / Daily (With batch No) Issue Statement by documents	
Justification	
Prototype/Mock Screen	

FBR-022: Inventory Report: Month coverage

Requirement ID	BR-022
Requirement Type	Input
Description/Business Logic	
Report will contain details of Month coverage as per the trend	
Justification	
Prototype/Mock Screen	

Dit document is beschikbaar op studeersnel
Downloaded by Original NVK (khanh25051999@gmail.com)

FBR-023: Inventory Report: Valuation of inventory

Requirement ID	BR-023
Requirement Type	Input
Description/Business Logic	
Report will contain Category wise -valuation of inventory materials	
Justification	
Prototype/Mock Screen	

FBR-024: Inventory Report: Monthly warranty/sales

Requirement ID	BR-024
Requirement Type	Input
Description/Business Logic	
Report will contain the details of monthly warranty/sales return statements	
Justification	
Prototype/Mock Screen	

FBR-025: Inventory Report: Current Dead Stock Analysis

Requirement ID	BR-025
Requirement Type	Input
Description/Business Logic	
Report will contain the current analysis of Dead Stock.	

Downloaded by Original NVK (khanh25051999@gmail.com)

Requirement ID	BR-025
Justification	
Prototype/Mock Screen	

FBR-026: Inventory Report: Scrap receiving statement

Requirement ID	BR-026
Requirement Type	Input
Description/Business Logic	
Report will contain the details of monthly/weekly scrap receiving statement from production floor.	
Justification	
Prototype/Mock Screen	

6 Requirements Priority & Status

Req. ID	Priority (*Essential (E), Conditional (C), Optional (O)*)	Status (*In-Process (I), Agreed To (A), Rejected (R)*)	Reason of Priority & Status
FBR-001	E	A	According to client's requirement.
FBR-002	E	A	According to client's requirement.
FBR-003	E	A	According to client's requirement.
FBR-004	E	A	According to client's requirement.
FBR-005	E	A	According to client's requirement.
FBR-006	E	A	According to client's requirement.
FBR-007	E	A	According to client's requirement.
FBR-008	E	A	According to client's requirement.
FBR-009	E	A	According to client's requirement.
FBR-010	E	A	According to client's requirement.
FBR-011	E	A	According to client's requirement.
FBR-012	E	A	According to client's requirement.
FBR-013	E	A	According to client's requirement.
FBR-014	E	A	According to client's requirement.

Dit document is beschikbaar op studeersnel
Downloaded by Original NVK (khanh25051999@gmail.com)

FBR-015	E	A	According to client's requirement.
FBR-016	E	A	According to client's requirement.
FBR-017	E	A	According to client's requirement.
FBR-018	E	A	According to client's requirement.
FBR-019	E	A	According to client's requirement.
FBR-020	E	A	According to client's requirement.

7 Quality Attributes (Non Functional Requirements)

SL No.	Requirements Description
NFBR-001	Security: User security requirement will have the following features: • Role • Privilege • User • User Log In • User Log Out Role base privilege(User will assign privilege)
NFBR-002	UI should be easy and attractive.
NFBR-003	Meaningful confirmation should be applied during insertion, modification, deletion.

Appendix

Item	Description/ Expansion
F&A	Finance and Accounts
GRN	Good Receipt Note
FBR	Functional Business Requirement
NFBR	Non Functional Business Requirement
UI	User Interface

Downloaded by Original NVK (khanh25051999@gmail.com)
